

## ## 1. Ticket Price Checker

### ### ⚡ Objective

Calculate and log a ticket price based on the user's age using conditional logic.

### ### 📁 Starter Files

```
```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <title>Ticket Price Checker</title>
  </head>
  <body>
    <h1>Ticket Price Checker</h1>
    <script src="conditions-ticket.js"></script>
  </body>
</html>
```
```

## >Your Task

- Prompt for the user's **age**.
- Use **if** / **else if** / **else** to assign:
  - Under 5 → Free
  - 5–17 → \$10
  - 18–64 → \$20
  - 65+ → \$12
